

Cystic Fibrosis Trust

Starter Activity

Read the terms on the left and the definitions on the right. Draw a line between from each matching term to link it to its matching definition.

A) Contagious

B) Treatment

C) Diagnosis

D) Heredity

1) The passing on of genetic information and traits from parents to their offspring.

2) The process of identifying a disease, illness or injury based on its symptoms.

3) A disease or illness that spreads from one person or organism to another.

4) Something designed to control a health problem, reduce its symptoms or clear it up.
